WORK EXPERIENCE

Freelance Power Platform Developer

Apr 2025 – Present

Self-Employed

- Developed an end-to-end business application for **Prairie Furniture Repair** using Power Apps and Power Automate
- Maintain Microsoft 365 environment and enterprise devices, ensuring system reliability and business continuity
- Automated the full client intake process, billing, invoicing, and internal tracking workflows
- Managed the full project lifecycle from requirements gathering through deployment for a real business client
- Built and manage the client's website using Microsoft Power Pages

Office Supervisor

May 2022 – Present

Leon's Furniture Regina

- Handle escalations and conflict resolution with professionalism, turning difficult situations into positive customer outcomes
- Primary point of contact for customers via phone, email, and in-person, managing the full order lifecycle using CRM and POS systems
- Managing accounts payable and accounts receivable
- Leveraged Microsoft 365 daily for communication, documentation, and internal coordination

CO-OP WORK EXPERIENCE

Associate System Developer Intern (CO-OP #3)

Co-operators Group of Companies, Regina, Saskatchewan

May 2025 – Aug 2025

- Translated complex business requirements into automation solutions, working closely with stakeholders to understand process gaps and improve user workflows.
- Designed and optimized scalable RPA solutions using C#, SQL, JSON, and APIs, enhancing system efficiency and reducing manual effort.
- Improved system reliability by enhancing exception handling, workflow resilience, and automation performance across business operations.
- Collaborated cross-functionally with business teams to identify pain points, prioritize solutions, and deliver process improvements that enhanced overall user experience.

Developer Intern – Innovation Solutions (CO-OP #2)

SaskPower, Regina, Saskatchewan

Sept 2024 – Dec 2024

- Replatformed 15+ legacy applications into Power Apps, improving usability, accessibility, and overall user experience for multiple business units.
- Maintained and optimized Power Apps and Power Automate workflows, ensuring system reliability and alignment with business needs.
- Developed key solutions including Safety Net and a procurement card platform, supporting efficient workflows and improved operational processes.
- Collaborated with teams using Azure DevOps and GitHub to support development, testing, and deployment of user-focused solutions.

Summer Student - Insights Analyst (CO-OP #1)

Saskatchewan Government Insurance, Regina, Saskatchewan

May 2024 – Aug 2024

- Collaborated with the Customer Insights team to support projects focused on understanding customer needs and improving user experiences
- Developed dashboards and reports using Power BI, translating data into meaningful insights and visual storytelling for decision-making.
- Worked with SharePoint and internal platforms to manage project data, documentation, and reporting workflows
- Conducted research on AI and user-centered applications, contributing to insights and frameworks that supported data-driven and ethical decision-making.

EDUCATION

Bachelor of Science - Computer Science Major

Jan 2022 – April 2026

University of Regina, Regina, Saskatchewan

AWARDS & HONORS

- Dean’s Honor List Spring Summer 2025, Spring Summer 2023, Fall 2022

KNOWLEDGE & SKILLS

Projects

- **Welcome Packages RPA** Aug 2025
Developed an end-to-end automation using C#, LINQ, SQL, and UiPath to validate Excel data and generate unique, client-specific bilingual (EN/FR) PDF packages, with automated SharePoint publishing and secure client email delivery.
- **Spotify Prototype** Jun2025
Designed a low-fidelity Spotify-inspired prototype in Figma using human-centered design principles, integrating AI-based recommendations and iteratively refining the experience based on usability testing.
- **Procurement Card Application** Dec 2024
Built an end-to-end Power App using Microsoft 365 Power Platform to digitalize SaskPower's procurement card process. Implemented automated approval workflows, dynamic data prefill, and role-based dashboards enabling real-time tracking and streamlined fulfillment.
