PROFESSIONAL SUMMARY

Recent Computer Science graduate (University of Regina, Co-op) with hands-on experience in customer experience research, survey design, and data analysis, including administering surveys on Medallia and Insignix, building Power BI dashboards, and reporting findings to senior leadership. Founder of Anax.ai, a free AI-powered tax assistant for Canadians, reflecting a passion for building user-focused solutions. Skilled in Power BI, SQL, survey and customer feedback platforms, and the Microsoft Power Platform, with a proven ability to turn data into clear, actionable insights. A quick-learning, detail-oriented professional with strong communication skills and a record of academic excellence.

INDEPENDENT VENTURE

Founder & Lead Designer / Developer — Anax.ai Jan 2026 – April 2026

- Founder of Anax.ai, an independent venture building a completely free, AI-powered tax assistant that helps Canadians understand their tax returns and make smarter financial decisions — driven by a mission to make financial literacy accessible to everyone.
- Lead the full product design end-to-end, from requirements and wireframes to a working prototype — designing an intuitive, privacy-first interface with an interactive tax calculator and a conversational AI chat assistant that keeps all financial inputs on the user's device.
- Built a Claude-based AI assistant grounded in official CRA sources (retrieval-augmented generation) for accurate, source-cited guidance, delivered through a clean, user-friendly chat experience. Stack: React, Node.js, Anthropic API.

WORK EXPERIENCE

Freelance - Data/CX insights Aug 2025– Present
Self-Employed | Upwork Remote

- Built and programmed custom surveys on Medallia and SurveyMonkey platforms for multiple clients, managing the process from questionnaire design through deployment and data collection.
- Created custom dashboards in Excel and Power BI to visualize customer experience data, enabling clients to track trends and make data-informed decisions.
- Independently analyzed survey results and wrote customer experience reports, translating findings into actionable recommendations for clients.
- Developed and maintained an end-to-end Power Platform applications, automating client intake, billing, invoicing, and internal tracking workflows to reduce manual effort.
- Managed a client's full Microsoft 365 environment (SharePoint, Teams, Outlook, permissions) and designed SharePoint site architecture and business websites to centralize documentation and communications.

Customer Care Supervisor May 2022 – Present
Leon's Furniture Regina, SK · On-site

- Manage service-related contracts, supply agreements, and vendor documentation; maintain accurate records across CRM and POS systems
- Handle customer inquiries in-person, by phone and email, resolving warranty issues, order concerns, and service complaints with professionalism and integrity
- Coordinate chargebacks and dispute resolutions directly with manufacturers, ensuring accurate claims and timely reimbursements
- Manage Flexiti financing program — processing applications, maintaining client financing records, and ensuring compliance agreements
- Support store manager and area supervisors with sales statistics, operational reports, and performance tracking on a regular basis
- Assist sales staff with CRM usage, product orders for furniture and appliances, and ensuring accurate and timely fulfillment of orders

CO-OP EXPERIENCE

Associate System Developer Intern (Co-op #3) May – Aug 2025
Co-operators Group of Companies Regina, SK · Hybrid

- Translated complex business requirements into intelligent UiPath automation solutions using Studio, attended/unattended robots, and Orchestrator, reducing manual effort and improving operational accuracy
- Engineered scalable RPA workflows integrating C#, SQL, JSON, and API integrations via Swagger UI and Postman, ensuring seamless system interoperability
- Maintained and enhanced automation pipelines, improving resilience, exception handling, and uptime — driving a culture of innovation and continuous process optimization

Developer Intern – Innovation Solutions (Co-op #2) Sept – Dec 2024
SaskPower Regina, SK · On-site

- Replatformed 15+ legacy applications into user-friendly, low-code/no-code Power Apps solutions, streamlining workflows and simplifying the experience for multiple business units.
- Designed and developed Safety Net and a corporate procurement card management platform, translating business requirements into intuitive, compliant tools that improved usability for end users.
- Collaborated with cross-functional teams using Azure DevOps and GitHub Copilot to optimize code, manage version control, and deploy user-focused solutions aligned with business needs.

Insights Analyst (Co-op #1)

Saskatchewan Government Insurance (SGI)

May – Aug 2024

Regina, SK · On-site

- Administered and monitored internal and external customer surveys using Medallia, overseeing data quality throughout the collection and reporting process.
- Collaborated with Insightrix, SGI's external research provider, on customer research for the new MySGI website, contributing to the review and refinement of feedback and survey methodology.
- Built Power BI dashboards pulling data from multiple source systems, delivering actionable customer insights to business stakeholders with clarity and speed.
- Authored and presented customer experience trend reports to senior director and management teams, supporting data-driven decision-making at the leadership level.
- Researched AI applications and authored a paper developing an ethical framework for responsible AI use across the organization's platforms.
